- High leaf to stem ratio.
- Excellent disease and pest resistance.
- Strong drought and heat tolerance.
- Extreme resistance to phytophthora root rot.
- Superb forage quality.
- Great salt tolerance.
- Excellent stand persistence and longevity under frequent cutting.
- Fall dormancy 10.
- Ideally suited for the deserts of Southern California, Saudi Arabia, and North Africa.
- Seed produced exclusively in the Imperial Valley, under same extreme geographical conditions in which it will be grown.
- Yields 25% more tonnage than CUF 101.
